Brazilian Hide Price Index,010

- The States listed in the index represent approximately 80% of the total leather exports (US\$) from Brazil.

- The Price Index takes in consideration the average price of fresh hides for each state and the percentage of leather exports originated in those states.

- In a country with continental dimensions, it is important to consider the hides from different areas in order to achieve more accurate price levels.

- This data represents trade levels from CICB members, and the prices of hides placed at the tanneries at the states listed above.
